PROJECTS

Composed Style — *View Live* - *View Source Code*

A member ecommerce clothing website with email/password as well as google login. It uses Google firebase for its database, and has stripe integration for accepting credit card payments.

Face Detection App — *View Live* – *View Source Code*

Member login site where users can add an image URL to have an AI detect if the image has a face, using the Clarifai API.

Gatsy Blog — *View Live* – *View Source Code*

A personal blog site, created with Gatsby and GraphQL, where I periodically post my thoughts.
